

RADIO PRAGUE

DETAILS OF ALL BROADCASTS VIA WORLD RADIO NETWORK

The following information is provided for use in your own schedules and is correct as at the date of issue.

Please note:

The technical details of digital satellite transmissions can be stated in various ways for your listeners. It is possible to provide many technical parameters but in our experience this may be confusing and in practice listeners can easily tune-in on most receivers with a minimum of information (frequency, polarisation, symbol rate and FEC). We give below the basic information we suggest you provide. Some additional optional information is given in italics that can be provided to those listeners who need it and also web links to additional information and footprint maps.

Summer 2003 (from 31 March 2003)

RADIO PRAGUE IN ENGLISH

To Europe on WRN English

UTC	CEST in Continental Europe
0900-0930	1100-1130
<i>Monday to Friday:</i>	
0330-0400	0530-0600

Satellite

Sky Digital on channel 872 via Astra 2B at 28 degrees east, 12.344 GHz, Horizontal, SR 27500, FEC 2/3
(Astra 2B south beam footprint at www.ses-astra.com/satellites/footprints.php?sat=13)

Eutelsat HOTBIRD 6 at 13 degrees east on 12.597 GHz, Horizontal, SR 27500, FEC 3/4. (For advanced or channel search, Service Identity Number (S-ID) is 8216)
(HOT BIRD 6 footprint map at www.eutelsat.com/satellites/13ehb6_popd.html#)
